Brief description:

What is meant with the term “compliance”? Many people understand something differently. It depends if they are active in the public sector or in the private sector. It depends if they live and work in Ukraine or e.g. , in German or the U.S. The reception of the term is so different as cultures among mankind. The role of compliance is getting more and more important, not only in western hemispheres. The private and the public sector understand compliance differently, but should approach this topic based on the same principles.

We will talk about the way to receive a good understanding of the compliance needs of every company or public office. POTENTIAL LIABILITY ISSUES IN CONNECTION WITH THE FCPA, THE UKBA AND OTHER FOREIGN LAWS

Agenda

- ▶ Potential liability issues under the FCPA
- ▶ Potential liability issues under the UKBA
- ▶ Relevance for Ukraine

Brief description:

Several extraterritorial law regimes from other countries have a long arm enforcement. The FCPA and the UKBA are the most prominent ones for anti-corruption in cases of a link to the U.S. and the UK. This link can exist very easily and can hit private and public sectors also in Ukraine. The trend to establish law regimes which can reach into the law regimes of other countries is still intact and well used. We will talk about the main risks and how to protect a company or public office against those risks.

Ario Deghani.

Brief description:

In many countries worldwide there are rankings of the most corrupted professions or industries. In Ukraine there is hardly any not affected by corruption. BROADER PERSPECTIVE: TAX AND LABOR COMPLIANCE, PROFESSIONALS ETHICS STANDARDS

Agenda

- ▶ Ukrainian reality
- ▶ Ways of transformation for private sector
- ▶ Ways of transformation for public sector

Brief description:

Compliance is far beyond staying away from corruption per se. Compliance is the system of conducting any activity in line with all applicable relevant legal requirements and ethical standards. These include tax, labor, competition, data protection, environmental compliance, as well as compliance with applicable ethical standards. Endemic Ukrainian corruption affected all these areas a lot, thus public and private sectors are in need of mindset change, as well as change of practices and adaptation to the new reality.

Lecturer:

Ario Dehghani

Agenda

- 🕒 What are good monitoring tools?
- 🕒 How to build up a robust compliance structure?

Brief description:

In my everyday work, I am always asked by clients, how to monitor compliance internally and how to build up a good compliance culture. Both are one of the most challenging things to accomplish in practice, where you need to show deeds and where just words are not enough. We will discuss how to approach these challenges, also in Ukraine.

Lecturer:

Ario Dehghani.

DATA PROTECTION: A GROWING ISSUE OF COMPLIANCE

Agenda

- ▶ The Ukrainian data protection obligations.
- ▶ Other law regimes influencing Ukrainian data protection approach (e.g., the GDPR).

Brief description:

Within the last 2-3 years, data protection became a hot topic for business and the public sector, especially in Europe. The Ukrainian data protection law is mainly based on the current applicable EU Directive for Data Protection. Based on its more less copy-paste implementation into Ukrainian law, not many understand in our country the importance of this law and to comply with it.
